INDEPENDENT AGENCY FOR ACCREDITATION AND RATING (IAAR) AWARDED WFME RECOGNITION STATUS

Press Release

18 January 2018

The Independent Agency for Accreditation and Rating (IAAR) of the Republic of Kazakhstan is the ninth agency to have been awarded Recognition Status by the World Federation for Medical Education (WFME). WFME Recognition Status has been awarded for ten years with immediate effect.

IAAR was established in 2011 as an independent, not-for-profit private company. IAAR activities are: institutional accreditation; programme accreditation; providing rankings of higher education study programmes; and consultancy and support work to institutions to develop internal quality assurance and prepare them for accreditation. In its first five years (2011-2016), IAAR completed accreditation visits to 46 educational institutions and 1,231 programmes.

WFME is satisfied that the accreditation process, post-accreditation monitoring and decision making by IAAR when it accredits these medical schools and faculties is to an appropriate and rigorous standard.

The WFME Recognition Programme follows the same principles as a medical school accreditation system: evaluation of documentation, policies and procedures; a site visit; and a decision taken by an independent committee with reference to pre-defined criteria.

The WFME Recognition Programme aims to raise the standards of medical education worldwide, through ensuring that national and regional accrediting agencies are acting in an appropriate, robust and transparent way. The intention is for all eligible accrediting agencies to be evaluated by WFME or to an equivalent standard. There are 120 organisations listed in the Directory of Organizations that Recognize/Accredit Medical Schools (DORA). Seven accrediting agencies have been recognised by WFME to date, and a further eight have formally commenced the process. A further 15 organisations are in active communication with WFME regarding their application.
