

THE NATIONAL CENTER FOR QUALITY ASSURANCE AND ACCREDITATION OF EDUCATIONAL AND TRAINING INSTITUTIONS (NCQAAETI) AWARDED WFME RECOGNITION STATUS

Press Release

February 2024

The National Center for Quality Assurance and Accreditation of Educational and Training Institutions (NCQAAETI) which is domiciled in Libya has been awarded Recognition Status by the World Federation for Medical Education ([WFME](#)) for the territory of Libya. WFME Recognition Status has been awarded for ten years with immediate effect.

The NCQAAETI is one of the main pillars of the reform and development of education in Libya. It aims to build and develop a comprehensive national system for evaluation, quality assurance and accreditation of all educational and training institutions, public and private, to develop the educational and training process, to reach the highest levels of quality, efficiency and excellence guided by international standards. The center is also responsible for promoting a culture of quality and setting and developing local accreditation standards in line with international standards. WFME is satisfied that the accreditation process, post-accreditation monitoring and decision making by the NCQAAETI when it accredits medical schools and faculties is to an appropriate and rigorous standard.

The [WFME Recognition Programme](#) follows the same principles as a medical school accreditation system: evaluation of documentation, policies, and procedures; a site visit; and a decision taken by an independent committee with reference to pre-defined criteria.

The WFME Recognition Programme aims to raise the standards of medical education worldwide, through ensuring that national and regional accrediting agencies are acting in an appropriate, robust, and transparent way. The intention is for all eligible accrediting agencies to be evaluated by WFME or to an equivalent standard.

There are about 120 organisations listed in the Directory of Organizations that Recognize/Accredit Medical Schools ([DORA](#)). 44 accrediting agencies have been recognised by WFME to date, and a further 14 have formally commenced the process. A further 14 organisations are in communication with WFME regarding their application.

Notes to editors:

1. The World Federation for Medical Education (WFME) is the non-governmental organisation (NGO) in official relation with the World Health Organization, representing medical education and medical schools worldwide.
2. WFME was established in 1972. It works in partnership with its six Regional Associations for Medical Education, the World Health Organization, the World Medical Association, and other global professional organisations to enhance the quality of medical education through delivery of its work programme, including:
 - Development of standards for medical education
 - Promotion of accreditation of medical schools
 - Management of the *World Directory of Medical Schools*, jointly with FAIMER, a member of Intealth.

For further information please see www.wfme.org.

3. The WFME programme of Recognition of Accrediting Agencies was established following the 2005 WHO-WFME strategic partnership to improve medical education. The programme aims to address the need for a robust and independent system for the evaluation and recognition of accreditation agencies. Detail about the criteria for eligibility and the policies and procedures of the programme are published on www.wfme.org.
4. The following accrediting agencies have been recognised by WFME:
